

The diagram illustrates a machine learning workflow. At the top left, a dark gray cylinder labeled 'Dataset' is connected by a large gray arrow to a dark gray gear labeled 'Machine Learning Algorithm' at the top right. Below the 'Dataset' is a trapezoidal shape that expands downwards to a table titled 'Descriptive Features'. This table has five columns and five rows of dashed lines, with three vertical dots below the last row. Below the 'Machine Learning Algorithm' is a downward-pointing gray arrow leading to another table titled 'Generated Features'. This table has three columns and four rows of dashed lines, with three vertical dots below the last row.
